PRESENT ON ALL PORTABLE DEVICES, ANYWHERE YOU WANT

crowdbeamer

an easy-to-use device
delivering a superior experience
to audiences of any size

crowdbeamer

The crowdbeamer device brings the benefits of real-time information sharing to both you and your audience - anywhere you want, from any device you want. It's portable. It doesn't require an internet connection. It delivers up-to-the-minute handouts to your audience, without the need for any paper. And it's easy to use.

Crowdbeamer enables you to present any type of content, including pictures, video and web pages, directly on the laptops, tablets & smartphones of your audience. Giving audiences of any size a clear view of what's being presented, the crowdbeamer mobile app delivers a superior experience to everybody in the audience and encourages an active engagement with your presentation.

crowdbeamer

A DEVICE TO SHARE ANY PRESENTATION CONTENT

Simply plug any appliance with an HDMI or VGA output into the crowdbeamer device, and start sharing any type of presentation content with your audience - including video and web pages.

Easy to use

With no software installation required, you will find it easy to put crowdbeamer to work wherever you need it. Use it with or without a projector or flat panel display, just focus on engaging your audience in your own natural style.

Fully mobile

Thanks to crowdbeamer's private Wi-Fi network and built-in battery, you can literally use it anywhere anytime – including meetings and discussions that take place outside the formal meeting room environment.

Entirely secure

While you share your presentation, your audience never needs to access any corporate network to enjoy crowdbeamer benefits. Stay in control when sharing – disabling forward viewing, safeguarding IP or blocking sensitive information.

AN APP TO TURN CONTENT INTO PERSONALIZED INFORMATION

The crowdbeamer app keeps your audience focused on what's relevant for them. It lets them decide which presentation content to capture and how to enrich it. They can easily scribble comments, add notes, mark text, attach tags, ... and build their private library of personalized information, sync it to the cloud, or export it to other business apps such as Adobe Acrobat Reader, Evernote and Microsoft OneNote.

In real time

Don't worry any longer about getting last-minute updates of your presentation to your audience. Crowdbeamer delivers real-time hand-outs to the app, ready to be reused off the shelf. That frees up valuable time to prepare your pres-entation in the best way possible.

A clear view

Gone are the days when low projector quality or inconvenient seating delivered a poor experience to your audience. With the crowdbeamer app installed on their smartphone, tablet or laptop, they always get the best view of what's being presented.

Full control

The crowdbeamer app lets your audience effortlessly cap-ture any screen content that you share, while avoiding infor-mation overload on their side. At any time, they can decide to capture whatever they consider to be relevant for them-selves.
